Message From Chairman

It's about getting the best people, retaining them, nurturing a creative environment & helping to find a way to innovate

At Sudarshan Group, we make it a priority to act as a responsible mining company, from our management practices to our health & safety standards to our stewardship of the environment. We understand that our business activity has an effect on the people who work in our operation, their environment, and on their communities.

We are committed to preserving the long-term health viability of the natural environment affected by our operations by using resources efficiently, applying a precautionary, proactive risk management approach to safeguarding the environment and preventing or mitigating the impacts of environmental incidents.

Our people – both employees and contractors – are our greatest asset and the core of success. We depend on skilled, hardworking and empowered people, and in writing, we seek to maintain a safety-first culture in which everyone is motivated to do the right thing to keep themselves and their colleagues healthy and injury-free.

RP Gupta
Chairman
Sudarshan Group

Who we are?

Sudarshan Addpack Pvt Ltd is an ISO 9001:2015, HACCP and BRC Certified manufacturer and exporter of FIBC Bags, PP Woven Bags/ Fabrics and BOPP Bags. We are a quality-oriented company focused on supplying quality products with better communication and transparency. As the motto of the company's management, the success of the company is dependent on the success of our customers.

We are currently manufacturing over 1000 Metric Tons per month of FIBC Bags and Small Bags. With our current exports accounting to over 400 Metric Tons to all the major part of the world.

Incepted in 1975, Sudarshan Group is enriched with experience which enables it to deal with the most challenging demand, our products are used in a wide variety of industrial applications.

With the quality-driven approach in our work, we maintain high-quality standards throughout the process and are committed to exploring new ideas and adopting innovative technologies. We make no compromise on the quality of the raw materials and strictly check the final products before sending the order to the clients.

Our Products

Individual commitment to a group effort - that is what makes a team work, a company work, a society work, a civilization work.

FIBC Bags

Flexible Intermediate Bulk Containers (FIBC) are the most popular form of bulk goods packing bags.

Majorly useful for the transport and storage of loose materials, these flexible containers are available in a wide variety and therefore are suitable for a number of applications in the food, minerals, chemicals, and agriculture industries. FIBC Bags are manufactured with different numbers of lifting loops, such as there can be one, two, or four as per customer's request and are also available with LDPE liners to allow safe storage of highly hygroscopic goods. Bags stitches can be additionally sealed for specific material.

Specifications

Convenient, fast loading and unloading of a large volume of goods by means of mechanized equipment

Fast and efficient distribution

Reusable

Fully Recyclable

Cost-effective due to less transport cost and more storage space

Easy and safe transport of goods

Made of polypropylene fabric of different basis weights and strength parameters

Coated/laminated with PP to protect goods from moisture and dust

Types we manufacture

- Regular Jumbo Bags (Type A)
- U + 2 and Circular Bags
- Liners with or without Tabbing
- Bags for Hazardous commodity (UN Bags)
- Tunnel Lift Loop Bags
- Anti-static Jumbo Bags (Type B)
- Ventilated Bags (With and without Interlocking)
- Glued Liner bags
- Dust Proof Bags
- Single Loop and Two Loop bags
- Conductive Jumbo Bags (Type C)
- Bottle Shaped/Pre-Shaped Liner Bags
- Certified Food Grade bags from Clean Room production
- Baffle Bags

PP Woven Fabrics

Circular Fabrics and Tapes manufactured with their respective world-class technologies available in the industry. In our fabric production, we take predefined strict quality measures and technical parameters that make our product almost flawless with a minimum of 1% defect. Polypropylene fabric consists of hydrophobic which restricts the possibility of moisture in the fabric and further, it extracts the moisture vapor away from the skin. Modern machinery and the adopted strategy of orientation on buyers' individual needs enable us to manufacture fabrics that satisfy all the requirements of our customers.

Application

 **Polypropylene Woven Bags**

 **FIBC Bags**

 **Wrapping**

 **Geo Textiles**

 **Tarpaulin**

PP Woven Bags

SAPL is one of the leading PP bag manufacturers and in India and exporter in the international market. Owing to long experience, we offer the best quality bags, tailored to customer's specifications. PP bags are largely flexible, durable, and cost-effective, which makes them highly usable in packing and transporting bulk commodities. We are the global leaders in manufacturing PP woven bags as per the specifications given by the client in a variety of sizes, colours, and quality.

Specifications

Assured Durability

Bags with UV Stability

Water and dustproof bags with PP Liners and lamination

Humidity resistant, anti-skid print

Fully Recyclable

BOPP bags

Biaxially Oriented Polypropylene is a propylene film that has been stretched using two machines across both directions. Available in various standard specifications, our bags have high transparency, clarity, and excellent tensile strength. Great durability and lasting prints embossed on the bags make the right representation of the brand. We also kept them cost-effective which makes them best suitable for the bulk orders.

Specifications

Excellent Clarity

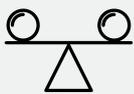

High Tensile Strength

Corona Treatment on both sides

High Gloss

Good Dimensional Stability and Flatness

Reverse Printing Ability

Low Electrostatic Charge

Waterproof

Infrastructure

We own the state-of-the-art infrastructures in our manufacturing plants. Being the most reliable bulk bag and fabrics manufacturer and supplier, our key unit in Silvassa is BRC Certified for Food Grade Packaging and Production.

Expanding further, we have completely functional and technologically empowered plants in Gujarat, Dhule and Maharashtra with a production capacity of 1000 metric tonnes each.

Instilled with ultra-advanced technologies, our Lohia PAPE plant has a spread of 125+ Lohia weaving looms, 3 highly advanced lamination plants and 6 functional BCS (Bag Cutting & Stitching) Machines.

We combine the right machines and resources to create our overall shared space of 2,50,000 sq. ft., that has superior machines, advanced techniques, 4 fledged flexographic printing machines, and an expert employee force of 600+ people. Sudarshan Add pack produces nearly 15,000 tons of polymer-based fibre and industrial bags and the production capacity is rapidly increasing year-over-year to serve the needs of our customers.
